EXECUTIVE SUMMARY

As a part of a comprehensive strategy to improve Vermont's long-term care system, the Department of Disabilities, Aging and Independent Living (hereafter, "the Department") conducts surveys with consumers to measure satisfaction with services and overall quality of life.

The Department contracted with Macro International Inc.—a survey research firm located in Burlington, Vermont—to conduct a statewide survey of individuals receiving services from Department-sponsored programs in 2007. The 2007 CSS asked consumers about their experiences with Attendant Services, Homemaker Services, Choices for Care Personal Care Services, and Adult Day Services.

The Consumer Satisfaction Survey (CSS) collected data about long-term care consumers from different areas around the State, and compared these results to those obtained by surveys conducted in 2006 and 2002. For the 2007 survey, a combination of mail and telephone surveys were conducted with adult (over the age of 18) long-term care consumers receiving Adult Day services, Choices for Care (CFC) Personal Care Services, Homemaker Services, and Attendant Services. In addition, results from a series of quality of life questions posed to a representative sample of the general Vermont population (who were not necessarily receiving long-term care services) were compared to the responses of long-term care consumers.

I. Overall Consumer Satisfaction

Consumers of the State's long-term care services indicated overwhelming satisfaction with, and approval of, the programs in which they participated. Satisfaction and approval ratings were high across all measures (Chart ES.1). In 2007, consumers were most satisfied with the courtesy shown by their caregivers, with 94% of consumers indicating they felt caregiver courtesy was either "excellent" or "good." Additionally, at least 84% of long-term care consumers statewide indicated similar levels of satisfaction with all services.

In 2007, satisfaction levels increased for six of 10 service elements compared to 2006 levels. However, there were no significant differences to report from 2006 to 2007 in overall levels of satisfaction. Satisfaction with problem resolution in 2007 (86%) was the same as 2006, both of which are significantly different from 2002 levels of satisfaction (78%). A similar upward trend was seen in satisfaction with the quality of assistance which in 2007 (91%) was down slightly from 2006 (92%) but both significantly higher than 2002 (86%). In addition to care giver courtesy (94%), other service elements receiving high overall satisfaction ratings in 2007 include percentage of consumers who felt the quality of assistance (91%), caregiver reliability (89%), caregiver communication (89%), how well people listen to needs (89%) and service scheduling (88%) were "excellent" or "good".

Chart ES.1: Percent of Respondents Statewide Who Rated Overall Services as Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

II. Quality of Life among Long-Term Care Consumers

Most elderly and disabled Vermonters who receive assistance from the State's long-term care services perceived the quality of their life as being generally good (Chart ES.2). Specifically:

- Most consumers (91%) had someone they could rely on for support in an emergency.
- The majority of consumers (90%) reported feeling safe in their homes.
- The majority of consumers (77%) felt mobile in their homes.
- The majority of consumers (71%) reported feeling safe outside their home and (71%) felt valued and respected.

However, long-term care consumers may experience a lesser quality of life than other Vermonters. On similar quality of life measures, the general Vermont population was consistently more positive about the quality of their lives than long-term care consumers, and indicated significantly higher levels of satisfaction in a number of areas. For example:

- Long-term care consumers reported feeling less mobility outside of the home than other Vermonters. Whereas 91% of Vermonters felt they can "get where I need and want to go", only 62% of LTC consumers felt the same way (a difference of 29%).
- Long-term care consumers were less likely (53%) than other Vermonters (80%) to be satisfied with their social lives and connections to the community (a difference of 27%).
- While 80% of Vermonters felt satisfied with how they spend their free time, just 59% of LTC consumers were satisfied (a difference of 21%).

On only one measure, satisfaction of long-term care consumers was not significantly different from the general Vermont public:

- The percentage of consumers who felt safe in their home (90% LTC consumers and 92% of all Vermonters).

Chart ES.2: Quality of Life Measures: A Comparison of Macro Poll and Long Term Care Consumer Satisfaction Survey (Percentage of Respondents Indicating Yes)

*indicates statistical difference between CSS Survey and Macro Poll at 5%

III. Consumer Satisfaction with Attendant Services Program

Long-term care consumers receiving Attendant Services indicated high levels of satisfaction with the care they received. For each service element, at least 90% of consumers were “always” or “almost always” satisfied (Chart ES.3).

- Consumers were most satisfied with two specific areas—the respect and courtesy they were shown by their care givers and the services received met their needs, with 93% indicating they were “always” or “almost always” satisfied with both aspects.
- While satisfaction levels have dropped slightly from 2006, there are no statistical differences to report when compared to 2007. The most notable drop in consumer satisfaction levels pertained to the quality of services received which dropped from 96% in 2006, to 90% in 2007.

Chart ES.3: Percentage of Respondents Who Were Always or Almost Always Satisfied with Attendant Service Aspects

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

IV. Consumer Satisfaction with Homemaker Services

At least 87% of long-term care consumers receiving Homemaker Services were “always” or “almost always” satisfied with all service elements (Chart ES.4).

In 2007, Consumers were most satisfied with the respect and courtesy shown by Homemaker Caregivers (92%) and knowledge of whom to contact with a complaint or for more help (90%). Satisfaction levels remain fairly consistent with previous years and there are no significant statistical differences to report.

In 2006 and 2007, LTC consumers receiving Homemaker services were considered, for analysis purposes, part of the Moderate Needs Group of consumers (MNG). The services provided to these consumers fall second in priority to the needs of CFC Personal Care High and Highest needs consumers as well as Adult Day High and Highest needs consumers, to which the MNG is statistically compared.

Chart ES.4: Percent of Respondents Who Were Always or Almost Always Satisfied with Homemaker Service Aspects

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

V. Consumer Satisfaction with Adult Day Services

Long-term care consumers who received Adult Day Services indicated high levels of satisfaction with the care they received. For each service element, at least 82% of consumers were “always” or “almost always” satisfied (Chart ES.5a).

Satisfaction levels remained consistent with the previous two years however a slight decline in satisfaction was reported with knowledge of who to contact with a complaint or for more help which dropped from 88% in 2006 to 82% in 2007. There were no significant statistical differences to report.

Consumers were most satisfied with when and where Adult Day services were provided (88%) and the respect and courtesy shown by Adult Day caregivers (88%).

Chart ES.5b breaks out the 2007 and 2006 responses of the Moderate Needs Group (MNG) from other program participants. Those consumers receiving Adult Day High and Highest needs services are compared to the MNG of Adult Day consumers who do not receive these highest needs services.

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

VI. Consumer Satisfaction with Choices for Care Personal Care Services

In both 2006 and 2007 consumers reported the lowest levels of satisfaction with the Choices for Care Personal Care services, when compared to the other services. There were no statistically significant differences to report however a slight increase in satisfaction was reported from 2006 to 2007 with when and where the services were provided (71% vs. 79%).

Choices for Care Personal Care services consumers were most satisfied with three service elements:

- 83% of CFC consumers reported they were “always” or “almost always” shown respect or courtesy by CFC Personal Care Service caregivers.
- 79% of CFC consumers indicated the services were “always” or “almost always” provided when and where they were needed.
- 79% of CFC consumers reported the services provided “always” or “almost always” met their needs.

Chart ES6b shows satisfaction levels of each CFC personal care services subgroups including: Flexible Choices, Surrogate Directed, Consumer Directed, and Home Health Agency consumers.

INTRODUCTION

In 2007, the Department conducted a survey of clients who utilize long-term care services. The Consumer Satisfaction Survey (CSS) provided the Department with measures of consumers' perceptions, experiences, and opinions about the services they receive. In 2007, the survey examined satisfaction with four different State services: Attendant Services, Homemaker Services, Choices for Care (CFC) Personal Care Services, and Adult Day Services. This report also includes data related to Home-Delivered Meals (HDM). Specifically, this survey effort assessed:

- Overall consumer satisfaction with services.
- The degree to which consumers perceived services as having value.
- The degree to which services have made a positive impact on the lives of consumers.
- The quality of life of individuals receiving services.
- Levels of consumer satisfaction with specific aspects of Attendant Services, Homemaker Services, Choices for Care Personal Care Services, and Adult Day Services.

In addition to measuring overall performance, the survey provided measures of consumer satisfaction at the county/regional level, allowing comparisons among individual counties/regions, and the State. The methodology was supported by a sampling plan that provides statistically valid estimates at the county/regional level. The Department intends to use this consumer input to support its service planning and evaluation process. The survey was administered to clients in the following counties and regions: Addison, Bennington, Caledonia, Chittenden/Grand Isle, Essex/Orleans, Franklin, Lamoille, Orange/Windsor, Rutland, Washington, and Windham.

The following chapters detail the results of the 2007 CSS; the report also compares these results to those obtained during the 2006 and 2002 survey.

- **Chapter I** describes an overview of long-term care services ratings for all services combined.
- **Chapter II** explains quality-of-life measures among Vermonters who use long-term care services, comparing the results to statewide responses of a representative sample of all adult Vermonters.
- **Chapters III, IV, V, and VI** present a more detailed picture of satisfaction with Attendant Services, Homemaker Services, Choices for Care Personal Care Services, and Adult Day Services.
- **Chapter VII** offers data from respondents who received Home-Delivered Meals (HDM).
- **Appendix A** provides a detailed overview of the survey methodology.
- **Appendix B** includes tables containing the number of consumers who responded to each survey question.
- **Appendix C** contains a copy of the survey questionnaire.

CHAPTER I. OVERVIEW OF LONG-TERM CARE SERVICES RATINGS

In 2007, consumers of the Department's long-term care services indicated overwhelming satisfaction with, and approval of, the services they received. Ratings remained consistently high across all measures, including caregiver courtesy, communication with caregivers and overall quality of assistance. Similar to 2006's results, there was some variation between the counties/regions. The data presented below represents responses to questions about four services: Adult Day Services, Choices for Care (CFC) Personal Care Services, Homemaker Services, and Attendant Services. The questions and programs discussed in this chapter are the same as in 2006 and 2002, and therefore offer the opportunity for year-to-year comparison.

In the questionnaire, respondents were asked to rate various service elements using one of two scales: the first scale included: "always," "almost always," "sometimes," "seldom," and "never". The second scale included: "excellent," "good," "fair" and "poor". Please note that in this report "above average" indicates a rating of "excellent" or "good", while "below average" indicates a rating of "fair" or "poor".

Sample sizes for data presented in Charts 1.1 through 1.12 are provided in *Appendix B*

A. SATISFACTION WITH LONG-TERM CARE SERVICE ELEMENTS

The majority of participants in the State's Attendant Services, Homemaker Services, Choices for Care Personal Care Services, and Adult Day Services were pleased with the type, quality, and amount of services they had received from these programs. The survey included 10 questions about different aspects of support and service delivery. Statewide, consumers rated their satisfaction with the programs as either "excellent" or "good". On average, satisfaction levels with service elements (i.e., average ratings of "excellent" or "good") in 2007 (88.1%) were slightly higher than 2006 (87.0%) and 2002 (84.4%) (Chart 1.0).

Satisfaction levels increased between 2006 and 2007 for six of 10 services elements; however, none of these differences are statistically significant. Satisfaction levels for two service elements dropped between 2006 and 2007- degree to which services met their needs (87% to 86%) and overall quality of services received (92% to 91%); however, this was not a statistically significant decrease.

While the level of satisfaction with these services was generally high, there was some variation among different service elements. Caregiver courtesy was yet again the most highly rated service element by program participants, with 94% of respondents indicating they felt this service element was either "excellent" or "good." All service elements received an overall rating of "excellent" or "good" by at least 84% of consumers.

Chart 1.0: Percentage of All Respondents Rating Amount of Choice and Control for All Services as Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

The following sections discuss survey results for each specific service element presented in the survey: amount of choice and control, quality of help received, timeliness of services, scheduling of services, communication with caregivers, caregiver reliability, degree to which services met consumers' needs, problem and concern resolution, caregiver courtesy, and how well staff listen. In addition, survey results concerning consumers' perception of the value of the services they receive, as well as the impact of services on their lives and their ability to remain in their homes, are presented. Results are summarized by county/region as well as statewide.

B. AMOUNT OF CHOICE AND CONTROL

In 2007, 84% of consumers statewide were satisfied (using a rating of "excellent" or "good") with their amount of choice and control when arranging services or care. This satisfaction level is the same as 2006 and slightly higher than the 2002 results (81%), but the difference is not statistically significant. (Chart 1.1a)

Chart 1.1b provides a break out of 2007 and 2006 responses by CFC Personal Care Service participants, labeled High/Highest, and the MNG. The MNG consists of consumers receiving Homemaker Services and/or Adult Day consumers who do not receive the highest needs Adult Day services. Statewide, satisfaction levels were greatest in 2007 for highest needs consumers with 86% indicating the amount of choice and control was excellent or good compared to 81% of the MNG. In 2006, statewide satisfaction levels were the same with 84% of both highest needs consumers and MNG consumers indicating choice and control for all services was "excellent" or "good".

A higher percentage of highest needs consumers in Bennington County reported above-average satisfaction in 2007 (100% vs. 69%) than did in 2006.

A higher percentage of MNG consumers in Caledonia (100% vs. 67%), Franklin (100% vs. 80%), and Rutland (93% vs. 85%) counties reported above-average satisfaction in 2007 than did in 2006.

*indicates statistical difference from statewide average at 5%

Chart 1.1b: Percentage of All Respondents Rating Amount of Choice and Control for All Services as Excellent or Good (2 of 2)

*indicates statistical difference from statewide average at 5%

C. QUALITY OF HELP RECEIVED

In 2007, 91% of consumers statewide rated the overall quality of help received as above average (with a rating of “excellent” or “good”). This percentage is down slightly from 2006 (92% vs. 91%) but still 5% higher than the 2002 results (86%), and represents a statistically significant increase.

Little variation by county or region was noted in 2007 – no above-average ratings by county were statistically different from the statewide average. (Chart 1.2)

Chart 1.2: Percentage of Consumers Who Rated Overall Quality of All Services as Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

D. TIMELINESS OF SERVICES

Statewide, 85% of long-term care service consumers rated the timeliness of all services as “excellent” or “good” as compared to 81% in 2006 and 82% in 2002

Consumers in Franklin (92%) and Rutland (93%) counties rated satisfaction with timeliness of services significantly higher than consumers statewide (85%). Only Orange/Windsor County consumers rated the timeliness of services as significantly below average (72%). (Chart 1.3)

Chart 1.3: Percentage of Consumers Indicating Timeliness of All Services was Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

E. SCHEDULING OF SERVICES

In 2007, 88% of consumers statewide said the schedule of when they received service or care was “excellent” or “good”, a small increase over 2006 (86%). The difference is not statistically significant.

The percentage of consumers in Franklin County (96% vs. 80%) in 2007 who rated the scheduling of services as above average was significantly greater than in 2006. In addition, a significantly higher percentage of consumers in Rutland (94%) rated their satisfaction with scheduling of services as above average than consumers statewide (88%). (Chart 1.4)

Consumers in Orange/Windsor County rated scheduling of services as below average (77%) which differs significantly from the statewide average (88%) in 2007.

Chart 1.4: Percentage of Consumers Who Indicated Service Scheduling of All Services was Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

F. COMMUNICATION WITH CAREGIVERS

Statewide, 89% of consumers rated their satisfaction with communication between themselves and their caregivers as “excellent” or “good” in 2007. This level of satisfaction is comparable to above-average ratings reported in 2006 (88%) and 2002 (87%).

A statistically significant percentage of consumers in Bennington (96% vs. 89%), Franklin (96% vs. 89%), and Windham (97% vs. 89%) counties rated their satisfaction with communication as above average than consumers across the State. (Chart 1.5)

Chart 1.5: Percentage of Consumers Who Indicated Communications with Caregivers was Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

G. CAREGIVER RELIABILITY

Overall, 89% of consumers statewide rated caregiver reliability as either “excellent” or “good” in 2007, representing an increase (although not statistically significant) in satisfaction from 2006 (87%) and 2002 (85%).

A significantly greater percentage of consumers in Rutland County (99%) reported high levels of satisfaction with caregiver reliability in 2007 than did in 2006 (86%) and 2002 (77%).

While most counties experienced an increase in consumer satisfaction with caregiver reliability, consumer satisfaction levels in Orange/Windsor County (79%) fell significantly below the state average (89%) in 2007. (Chart 1.6)

Chart 1.6: Percentage of Consumers Who Rated Caregiver Reliability as Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

H. DEGREE TO WHICH SERVICES MEET CONSUMER NEEDS

Statewide, 86% of consumers in 2007 felt that the long-term care services they received from the State were an “excellent” or “good” match for their needs. This rating is slightly lower than in 2006 (87%), but the difference is not statistically significant.

Consumers in Franklin (92%) and Rutland (94%) counties provided significantly higher ratings of satisfaction in 2007 than did consumers statewide (86%). However, consumer satisfaction levels in Windham County (72%) fell significantly below the statewide average (86%) in 2007. (Chart 1.7)

**Chart 1.7: Percentage of Consumers Who Rated
the Degree to Which All Services Met Their Needs as Excellent or Good**

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

I. PROBLEM AND CONCERN RESOLUTION

When asked how effectively problems or concerns with their care were addressed, 86% of consumers statewide reported “excellent” or “good” resolution in the 2007 survey. This percentage is consistent with satisfaction levels in 2006 (86%), both of which are significantly higher than 2002 (78%) satisfaction levels.

Consumers in Rutland County continued the upward trend in satisfaction levels in 2007 with 94% indicating problem resolution was “excellent” or “good” compared to 86% in 2006 and 77% in 2002. While the increase in satisfaction between 2007 and 2006 (94% vs. 86%) is not significant, the increase in 2007 is significant when compared to 2002 satisfaction levels (94% vs. 77%).

96% of consumers in Addison County reported above average satisfaction with problem resolution in 2007 – a significant difference from consumers statewide (86%).

Consumers in Orange/Windsor (76%) and Washington (74%) counties indicated a drop in satisfaction levels in 2007, both of which are significantly lower than consumers statewide (86%). (Chart 1.8)

Chart 1.8: Percentage of Consumers Who Indicated Problem Resolution was Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

J. CAREGIVER COURTESY

In 2007, consumers indicated a higher level of satisfaction with the courtesy shown by their caregivers than any other aspect of the State's long-term care programs and services. Overall, 94% of consumers statewide indicated that caregiver courtesy was above average, a slight (but not statistically significant) increase over 2006 (93%) and 2002 (92%) results.

Satisfaction with caregiver courtesy was consistent across the state – no county/region showed a significant difference in their satisfaction rating compared to the statewide average in 2007. (Chart 1.9)

**Chart 1.9: Percentage of Consumers Who Indicated
Caregiver Courtesy was Excellent or Good**

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

K. HOW WELL STAFF LISTEN

Statewide, 89% of consumers rated how well staff listened to their needs and preferences as “excellent” or “good” during the 2007 survey. Satisfaction for this program element has increased slightly (although not significantly) from 2006 (86%) and 2002 (85%).

Consumers in Franklin County (96% vs. 89%) were significantly more likely than consumers statewide to rate satisfaction with how well staff listen to their needs and preferences as “excellent” or “good”.
(Chart 1.10)

Chart 1.10: Percentage of Consumers Who Indicated Staff Listening Skills Were Excellent or Good

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

I. PERCEIVED VALUE OF SERVICES RECEIVED

When asked about the value of the services received (measured against what consumers paid for these services), 78% of consumers statewide responded that the services were indeed "a good value" in 2007 (Figure 1.11). This percentage is slightly lower than 2006 (83%) and 2002 (86%), but the difference is not statistically significant.

Consumers in Addison (89%) and Lamoille (90%) counties were significantly more likely to find the services they received a good value than consumers statewide (78%).

Figure 1.11: Value of Services

For what you paid for the services you receive(d) did you find them a good value?

	Yes			No		
County	2002	2006	2007	2002	2006	2007

M. IMPACT OF SERVICES ON CONSUMERS' LIVES

An overwhelming majority (91%) of long-term care consumers statewide reported that the help they received from State services made their lives either “much better” or “somewhat better” in 2007. This result is consistent with 2006 (94%) and 2002 (92%), but the difference is not statistically significant.

Among consumers who felt that the services made life “much” or “somewhat” better, ratings in 2007 in Washington County were significantly lower in 2007 than in 2002 (86% and 100%, respectively).

However consumers in Franklin (96%) and Lamoille (97%) counties were more likely to indicate the help they received has made their life “much” or “somewhat” better than consumers statewide (91%). (Chart 1.12)

Chart 1.12: Would you say the help you received has made your life...Percent Responding Much Better or Somewhat Better

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

N. IMPACT ON CONSUMERS' ABILITY TO REMAIN IN THEIR HOMES

In 2007, 84% of consumers statewide felt it would be "difficult" or "very difficult" to remain in their homes if they did not receive long-term care services. The percentage of respondents reporting "very difficult" or "difficult" statewide was consistent with the survey results from 2006 (81%) and 2002 (80%).

Consumers in Rutland County in 2007 were significantly more likely to respond it would be "difficult" or "very difficult" to stay in their homes if they did not receive services than in 2002 (88% vs. 67%, respectively).

Consumers were consistent across all regions with no region reporting a significant difference from the statewide average in 2007. (Chart 1.13)

Chart 1.13: How Easy Would It Be for You to Stay in Your Home if You Did Not Receive Services: Percent Responding Difficult or Very Difficult

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

CHAPTER II. QUALITY OF LIFE AMONG VERMONTERS USING LONG TERM CARE SERVICES

As in prior years, 2007 survey results show that, overall, elderly and disabled Vermonters who received the State's long-term care services seemed to hold very different perceptions about their quality of life in comparison to the general Vermont public.

A total of 12 questions designed to assess quality of life were administered to long-term care survey participants. Eleven of these 12 questions were also administered to a random sample of Vermonters in a Macro Poll conducted in 2007. Macro Poll results are generalizable to the Vermont population as a whole, provide an accurate assessment of trends and perceptions statewide, and may be compared descriptively to results from the CSS. Statewide results for nine of the quality-of-life questions presented in the Macro Poll and those from long-term care consumers in 2007, 2006 and 2002 are provided in Chart 2.1. For 2007, two new questions were asked in the Macro poll and results are provided in Chart 2.3 and Chart 2.4. These new questions replaced two questions asked in 2002 and 2006: "I am concerned I will not have enough money for the essentials" and "I am concerned that one day I may have to go to a nursing home". These two questions were removed because no significant differences were found in responses provided.

When looking at the 2007 data, results showed that most elderly and disabled Vermonters who received assistance from the State's long-term care services perceived their quality of life as good on several measures:

- Most consumers (91%) had someone they could rely on for support in an emergency.
- The majority of consumers (90%) reported feeling safe in their homes.
- The majority of consumers (77%) felt mobile in their homes.
- The majority of consumers (71%) reported feeling safe outside their home and (71%) felt valued and respected.

Another way to understand the data is by comparing the responses of consumers of long-term care services to the responses of the general Vermont population (referred to as "Vermonters"). Survey data suggests that consumers of long-term care may experience a lower quality of life than other Vermonters. Comparison of Department consumers with Vermonters statewide (as measured by the Macro Poll) shows that Vermonters were consistently more positive about the quality of their lives than were long-term care consumers. Vermonters also indicated substantially higher levels of satisfaction on a number of measures. In fact, the responses of long-term care recipients were statistically different from statewide results for eight of the nine questions displayed in Chart 2.1. The areas of greatest difference between Vermonters and LTC consumers include mobility outside the home, satisfaction with social life, and satisfaction with free time:

- Long-term care consumers reported feeling less mobility outside of the home than other Vermonters. Whereas 91% of Vermonters felt they can "get where I need and want to go", only 62% of LTC consumers felt the same way (a difference of 29%).
- Long-term care consumers were less likely (53%) than other Vermonters (80%) to be satisfied with their social lives and connections to the community (a difference of 27%).
- While 80% of Vermonters felt satisfied with how they spend their free time, just 59% of LTC consumers were satisfied (a difference of 21%).

On only one measure, satisfaction of long-term care consumers was not significantly different from the general Vermont public:

- The percentage of consumers who felt safe in their home (90% of LTC consumers and 92% of all Vermonters).

A. PERCEIVED VALUE AND DEGREE OF RESPECT

The percentage of long-term care consumers who reported that they feel valued and respected in 2007 (71%) represents a statistically significant difference from the 2007 Macro Poll results of 86%.

B. SATISFACTION WITH SOCIAL LIFE

A little more than half of long-term care consumers statewide (53%) indicated satisfaction with their social life and connections to the community, which is consistent with 2006 (54%) and 2002 (50%) results. The 2007 LTC results (53%) represent a statistically significant difference from the 2007 Macro Poll results of 80%.

C. SUPPORT IN AN EMERGENCY

Ninety-one percent of 2007 long-term care consumers statewide indicated they had someone to count on in an emergency—this is a slight decrease from 2006 (93%) results but the difference is not significant. The 2007 LTC results (91%) represent a statistically significant difference from the 2007 Macro Poll results of 96%.

D. CONTACT WITH FAMILY AND FRIENDS

Satisfaction levels with the amount of contact long-term care consumers had with family and friends in 2007 (66%) was consistent with 2006 (66%) results and slightly higher than 2002 (63%). The 2007 LTC results (66%) represent a statistically significant difference from the 2007 Macro Poll results of 77%.

E. SATISFACTION WITH FREE TIME

In 2007, 59% of long-term care consumers reported satisfaction with the way they spent their free time, down slightly from 2006 (61%). The 2007 LTC results (59%) represent a statistically significant difference from the 2007 Macro Poll results of 80%.

F. MOBILITY INSIDE THE HOME

Long-term care consumers felt more positively about their ability to get around inside their homes than outside of their homes again in 2007. In 2007, 77% of consumers statewide indicated that they could get around inside their home as much as they need to. This is a slight increase from 2006 (70%) and 2002 (70%) results. The 2007 LTC results (77%) represent a statistically significant difference from the 2007 Macro Poll results of 97%.

G. MOBILITY OUTSIDE THE HOME

Statewide, 62% of long-term care consumers surveyed in 2007 reported they could get where they needed or wanted to go, compared to 58% who reported similar feelings in 2006 and 52% in 2002. The 2007 LTC results (62%) represent a statistically significant difference from the 2007 Macro Poll results of 91%.

H. SAFETY IN THE COMMUNITY (OUTSIDE THE HOME)

In 2007, 71% of long-term care consumers statewide felt safe in their communities which is consistent with 2006 (71%) and 2002 (68%) results. The 2007 LTC figures (71%) represent a statistically significant difference from the 2007 Macro Poll results of 87%.

I. SAFETY AT HOME

In 2007, an overwhelming majority (90%) of long-term care consumers felt safe in their homes. The 2007 LTC results (90%) are the only figures not statistically different from the Macro Poll results of 2007 (92%).

J. OVERALL QUALITY OF LIFE

In 2007, 68% of consumers statewide indicated that their quality of life was “excellent” or “good,” a slight, although not significant, increase over the percentage who reported above average quality of life in 2006 (61%). However, the 2007 results (68%) do represent a significant increase from 2002 results (57%). (Chart 2.2)

A county/regional analysis shows that the percentage of consumers reporting an above-average quality of life in 2007 increased from 2006 results in 8 of 11 regions. Slightly fewer consumers in Addison (65% vs. 77%), Bennington (64% vs. 75%) and Chittenden/Grand Isle (62% vs. 64%) counties reported lower levels of satisfaction with quality of life in 2007 than did in 2006. However, these differences are not statistically significant.

The increased satisfaction in 2007 was fairly consistent across the state with no region reporting a statistically significant difference from the statewide average (68%)

Consumers in Franklin County were significantly more likely to consider their quality of life “excellent” or “good” in 2007 than in 2006 (74% vs. 49%).

K. HOSPITALIZATION QUESTIONS

L. COMPARISON OF HEALTH TO PEOPLE YOUR OWN AGE

Added to the CSS survey in 2007 was a question asking the consumer to compare his or her health to others who are the same age and provide a rating using the following five point scale: "excellent", "very good", "good", "fair" or "poor". Chart 2.3 shows the percentage of respondents by region who rated their health as "excellent" or "very good" compared to people their own age.

Chart 2.3 breaks out each of the five sub groups of the Choices for Care Personal Care Services (moderate, flexible choices, surrogate directed, consumer directed and agency directed) and compares them to a representative sample of adult Vermonters statewide, represented by the Macro Poll. Statewide, Vermonters were much more likely to rate their health as "excellent" or "very good" than CFC Personal Care consumers. Three instances where CFC Personal Care Service consumers were more likely to rate their health as "excellent" or "very good" than other Vermonters were recorded in Caledonia (Macro Poll 59% vs. Surrogate Directed 67%), Orange/Windsor (Macro Poll 75% vs. Flexible Choices 100%) and Washington counties (Macro Poll 77% vs. Consumer Directed 100%)

Chart 2.3: Compared to other people your age, would you say your health is: Percent responding 'Excellent' or 'Very good' Page 1 of 2

*Significance testing was not performed as sample sizes were not large enough to support this analysis

Chart 2.3: Compared to other people your age, would you say your health is: Percent responding 'Excellent' or 'Very good' Page 2 of 2

*Significance testing was not performed as sample sizes were not large enough to support this analysis

II. COMPARISON OF HEALTH TO ONE YEAR AGO

Added to the CSS survey in 2007 was the following question: Compared to one year ago how would you rate your health in general now? Respondents were given the following five point scale to rate their health: “much better now than one year ago”, “somewhat better now than one year ago”, “about the same”, “somewhat worse now than one year ago”, or “much worse now than one year ago”. Chart 2.4 shows the percentages of respondents from each region rating their health as either “much better now than one year ago” or “somewhat better now than one year ago”.

Chart 2.4 breaks out each of the five sub groups of the Choices for Care Personal Care Services (moderate, flexible choices, surrogate directed, consumer directed and agency directed) and compares them to a representative sample of adult Vermonters statewide, represented by the Macro Poll. Statewide, consumers in the Flexible Choices subgroup (33%) were more likely to indicate their health is “much better” or “somewhat better” now than one year ago than any other group including the general adult Vermont population sampled in the Macro Poll (24%) in 2007.

Chart 2.4: Compared to one year ago, how would you rate your health in general now: Percent responding 'Much better' or 'Somewhat better' Page 1 of 2

*Significance testing was not performed as sample sizes were not large enough to support this analysis

Chart 2.4: Compared to one year ago, how would you rate your health in general now: Percent responding 'Much better' or 'Somewhat better' Page 2 of 2

*Significance testing was not performed as sample sizes were not large enough to support this analysis

III. HOSPITALIZATION IN THE LAST 12 MONTHS

In 2007, consumers were asked four new questions pertaining to their hospital experiences in the past year. The first question asks respondents if they have been hospitalized in the past 12 months. Consumers responding “yes” are shown by region in Chart 2.5.

**Chart 2.5: In the past 12 months, have you been hospitalized:
Percent responding "Yes" Page 1 of 2**

*Significance testing was not performed as sample sizes were not large enough to support this analysis

**Chart 2.5: In the past 12 months, have you been hospitalized:
Percent responding "Yes" Page 2 of 2**

*Significance testing was not performed as sample sizes were not large enough to support this analysis

IV. HELP WITH DAILY ACTIVITIES

As part of a series of new questions about hospitalization, consumers who had been hospitalized were asked to think back to their most recent hospitalization and indicate using “yes” or “no” whether they needed help with daily activities. Chart 2.6 shows by region the percentages of consumers responding “yes” in 2007.

Chart 2.6: For respondents who were hospitalized, when you left the hospital, did you need help with daily activities: Percent responding 'Yes' (Page 1 of 2).

*Significance testing was not performed as sample sizes were not large enough to support this analysis

Chart 2.6: For respondents who were hospitalized, when you left the hospital, did you need help with daily activities: Percent responding 'Yes' (Page 2 of 2)

*Significance testing was not performed as sample sizes were not large enough to support this analysis

V. HOW WERE YOU INFORMED ABOUT GETTING THE HELP YOU NEEDED

Consumers who were hospitalized and needed help with daily activities were then asked, as part of a new series of questions, “Before you left the hospital did someone talk to you about ways of getting the help you needed?” Consumers were given the following four options to respond: “yes, the hospital staff told me”; “yes, a choices for care representative told me”; “no, I was too ill at the time but my family member/friend was informed”; and “no one spoke to me or my family member/friend”. Charts 2.7a-d shows consumer responses by region.

Chart 2.7a: For respondents who were hospitalized, when you left the hospital, did you need help with daily activities: Percent responding 'Yes, the hospital staff told me' (page 1 of 2)

*Significance testing was not performed as sample sizes were not large enough to support this analysis

CHAPTER III. SATISFACTION WITH ATTENDANT SERVICES

Long-term care consumers who received Attendant Services indicated high levels of satisfaction with the care they had received in 2007, 2006 and 2002. For each service element, at least 90% of consumers statewide indicated they were “always” or “almost always” satisfied in 2007 (Charts 3.1-3.5). Overall, consumers statewide were most satisfied with the ability of the services to meet their needs (93%), and the respect and courtesy shown to them by their caregivers (93%). In 2007, statewide satisfaction with Attendant Services declined slightly from 2006 in each service element however none of these differences were significant.

With few exceptions, consumers in all Vermont regions rated service elements with Attendant Services very highly. For example, in each of the following areas, at least 90% of consumers rated all service elements as “excellent” or “good”:

- Addison
- Bennington
- Rutland
- Washington
- Windham

Sample sizes for data presented in Charts 3.1- 3.5 are provided in *Appendix B*

A. SATISFACTION WITH THE QUALITY OF SERVICES

A vast majority of Attendant Service consumers were satisfied with the quality of the services provided, with 90% indicating they were “always” or “almost always” satisfied. Satisfaction with the quality of Attendant Services declined statewide in 2007 (90% vs. 96%) but remains higher than 2002 results (90% vs. 87%). These differences are not statistically significant.

In four Vermont counties or regions, 100% of consumers reported “always” or “almost always” being satisfied with the quality of services; these were Addison, Bennington, Essex/Orleans, and Windham. These results represent statistically significant differences from the statewide average (90%) in 2007.

In 2007, satisfaction levels declined in five counties or regions when compared to 2006 results; these were Caledonia (80% vs. 100%), Chittenden/Grand Isle (80% vs. 100%), Franklin (82% vs. 93%), Lamoille (88% vs. 100%), and Orange/Windsor (88% vs. 100%). However, none of these declines in satisfaction represent statistically significant difference. (Chart 3.1)

Chart 3.1: Percentage of Consumers Who Were Always or Almost Always Satisfied With the Quality of Attendant Services

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

B. DEGREE TO WHICH SERVICES MEET CONSUMERS NEEDS

In 2007, 93% of consumers statewide reported that the Attendant Services they received “always” or “almost always” met their needs. This level of satisfaction is down slightly from 2006 (94%) but remains higher than 2002 results (87%). These varying levels of satisfaction are not statistically significant.

In seven counties, consumers reported 100% satisfaction levels in 2007; Addison, Bennington, Chittenden/Grand Isle, Essex/Orleans, Lamoille, Washington, and Windham. Satisfaction levels in these counties represent a significant difference from satisfaction levels statewide (93%) in 2007.

Satisfaction declined in four counties in 2007 when compared to 2006; Caledonia (80% vs. 100%), Franklin (76% vs. 93%), Orange/Windsor (88% vs. 100%), and Rutland (90% vs. 92%). However, none of these changes are statistically significant. (Chart 3.2)

Chart 3.2: Percentage of Consumers Who Indicated That Attendant Services Always or Almost Always Met Their Needs

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

C. RESPECTFULNESS AND COURTESY OF ATTENDANT SERVICES CAREGIVERS

Consumers across the State rated high levels of satisfaction with the respect and courtesy shown by Attendant Service caregivers – 93% were “always” or “almost always” satisfied in 2007. These survey results are down slightly from 2006 results (96%) but the difference is not significant.

100% of consumers in four counties reported satisfaction with the respect and courtesy shown by Attendant Service caregivers; Addison, Bennington, Essex/Orleans, and Windham – a significant difference from the statewide average (93%).

A decline in satisfaction was reported in Caledonia (80% vs. 100%), Lamoille (86% vs. 100%), Orange/Windsor (94% vs. 100%) and Rutland counties (90% vs. 96%) when compared to 2006 survey results. These differences are not statistically significant. (Chart 3.3)

Chart 3.3: Percentage of Consumers Who Indicated That They Were Always or Almost Always Shown Respect and Courtesy by Attendant Services Caregivers

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

D. KNOWLEDGE OF WHOM TO CONTACT WITH COMPLAINTS OR REQUESTS

Statewide, 91% of consumers who received Attendant Services reported that they “always” or “almost always” knew whom to contact if they had a complaint or wanted to request more help from the program. Satisfaction levels statewide are consistent across all years with 91% satisfaction in 2007, 92% in 2006, and 90% in 2002.

As with several other aspects of satisfaction with Attendant Services, 100% of consumers in Addison, Bennington, Lamoille, and Windham counties “always” or “almost always” knew whom to contact with a complaint – a statistically significant difference from statewide average results (91%) in 2007. (Chart 3.4)

Chart 3.4: Percentage of Consumers Who Always or Almost Always Knew Whom to Contact with a Complaint or for More Help

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

E. MEETING CONSUMERS' NEEDS WHEN AND WHERE NECESSARY

Statewide, 92% of Attendant Services consumers surveyed in 2007 indicated services were “always” or “almost always” provided when and where they were needed. This level of satisfaction is down slightly (although not significantly) from 2006 results (95%) but remains higher than satisfaction in 2002 (82%).

Consumers in Addison, Bennington, Chittenden/Grand Isle, Essex/Orleans, Lamoille, and Windham counties were significantly more likely (100% in all counties) than consumers statewide to “always” or “almost always” report this level of satisfaction. (Chart 3.5)

Chart 3.5: Percentage of Consumers Who Indicated Attendant Services Were Always or Almost Always Provided When and Where They Needed Them

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

CHAPTER IV. SATISFACTION WITH HOMEMAKER SERVICES

At least 87% of consumers statewide rated each element of Homemaker Services as “excellent” or “good” (Charts 4.1-4.5). In 2007, satisfaction levels increased for all five program aspects statewide- none of these increases are statistically significant. Statewide, consumers were most satisfied with the respect and courtesy shown by Homemaker caregivers (92%) in 2007.

As with the CFC Personal Care Services, the composition of Homemaker Services changed between 2002 and 2006. In 2002, Homemaker Service respondents included multiple types of consumers. In 2006 and 2007, however, all respondents from Homemaker Services were part of the Moderate Needs Group (MNG) of long-term care consumers.

A. SATISFACTION WITH QUALITY OF SERVICE

Statewide, 87% of respondents who received Homemaker Services reported being “always” or “almost always” satisfied with the quality of the services they received. These results are up slightly from 2006 (83%) but the change is not statistically significant.

Satisfaction levels in three counties – Bennington, Washington, and Windham – reached 100% in 2007. These results are significantly different from the statewide average (87%) in 2007. (Chart 4.1)

Chart 4.1: Percent of Consumers Who Were Always or Almost Always Satisfied With the Quality of Homemaker Services

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

B. DEGREE TO WHICH SERVICES MET CONSUMERS NEEDS

Statewide, 88% of consumers who received Homemaker Services reported that the services they received “always” or “almost always” met their needs. This level of satisfaction is up from 2006 levels (79%) however the increase is not statistically significant.

Satisfaction levels in three counties reached 100% in 2007 (Bennington, Caledonia, and Windham) representing a statistically significant difference from the statewide average of 88%. Sixty five percent of consumers in Orange/Windsor County reported that Homemaker Services “always” or “almost always” met their needs which is significantly lower than the statewide average (88%) in 2007.

Statistically significant increases in satisfaction were reported in 2007 in Caledonia (100% vs. 25%) and Chittenden/Grand Isle (87% vs. 40%). (Chart 4.2)

Chart 4.2: Percentage of Consumers Who Indicated That Homemaker Services Always or Almost Always Met Their Needs

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ Indicates statistical difference from 2007 at 5%

C. RESPECTFULNESS AND COURTESY OF HOMEMAKER SERVICES CAREGIVERS

Statewide, 92% of consumers who received Homemaker Services indicated their caregivers “always” or “almost always” treated them with respect and courtesy. Satisfaction levels increased from 2006 (86%) and returned to a level similar to 2002 survey results (94%).

Four counties reported 100% satisfaction with this service element in 2007 (Bennington, Caledonia, Essex/Orleans, and Windham) and all represent a statistically significant difference from the statewide average of 92%.

In 2007, satisfaction levels in Caledonia County increased significantly from 2006 survey results (100% vs. 25%), the same level of satisfaction reported in 2002 (100%). (Chart 4.3)

Chart 4.3: Percentage of Consumers Who Indicated that They Were Always or Almost Always Shown Respect and Courtesy by Homemaker Caregivers

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

D. KNOWLEDGE OF WHOM TO CONTACT WITH COMPLAINTS OR REQUESTS

In 2007, 90% of Homemaker Service consumers statewide reported they knew whom to contact with complaints or requests. This percentage is up slightly from 2006 results (81%) but the increase is not statistically significant.

Three counties reported 100% satisfaction (Bennington, Essex/Orleans, and Windham), which represents a statistically significant difference from the statewide average (90%). (Chart 4.4)

Chart 4.4: Percentage of Consumers Who Always or Almost Always Knew Whom to Contact with a Complaint or for More Help

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

E. MEETING CONSUMERS' NEEDS WHEN AND WHERE NECESSARY

Statewide, 88% of consumers receiving Homemaker Services indicated the services were “always” or “almost always” provided when and where they were needed. Satisfaction levels in 2007 (88%) are up slightly from 2006 (82%) and 2002 (82%) but the difference is not statistically significant.

Satisfaction with this service element reached 100% in three counties in 2007 (Bennington, Caledonia, and Windham). Consumers in these counties were significantly more likely than consumers statewide (88%) to be satisfied with when and where their Homemaker services were provided in 2007.

In 2007, a significant increase in satisfaction with this service element was reported (100% vs. 25%) when compared to 2006 results. (Chart 4.5)

**Chart 4.5: Percentage of Consumers Who Indicated
Homemaker Services Were Always or Almost Always Provided When
and Where They Needed Them**

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

CHAPTER V. SATISFACTION WITH THE ADULT DAY SERVICES

At least 82% of Adult Day Service consumers were “always” or “almost always” satisfied with each service element asked about during the 2007 survey. Consumers were most satisfied with the degree of respect and courtesy they received from their caregivers (88%) and the ability to provide services when and where they are needed (88%).

Sample sizes for data presented in Charts 5.1-5.5 are provided in *Appendix B*

A. SATISFACTION WITH QUALITY OF SERVICES

Eighty-four percent of consumers statewide who received Adult Day Services indicated they were “always” or “almost always” satisfied with the quality of the services they received. Survey results statewide in 2007 (84%) are up slightly from 2006 results (83%) but remain just below satisfaction levels in 2002 (87%). The differences in these satisfaction levels are not statistically significant.

Consumers in Addison (95%) and Bennington (100%) counties were significantly more likely than consumers statewide (84%) to indicate they were “always” or “almost always” satisfied with this service element than consumers statewide (84%) in 2007. (Chart 5.1)

Chart 5.1: Percentage of Consumers Who Were Always or Almost Always Satisfied With the Quality of Adult Day Services

*indicates statistical difference from statewide average at 5%

B. DEGREE TO WHICH SERVICES MET CONSUMER NEEDS

In 2007, 84% of consumers statewide indicated the Adult Day Services “always” or “almost always” met their needs which is down slightly, although not significantly, from 2006 (87%) and 2002 (87%) survey results.

Consumers in Addison (95%), Bennington (100%), and Washington (100%) counties were significantly more likely to indicate they were “always” or “almost always” satisfied with the services provided than were other consumers across the State (84%). (Chart 5.2)

Chart 5.2: Percentage of Consumers Who Indicated That Adult Day Services Always or Almost Always Met Their Needs

*indicates statistical difference from statewide average at 5%

C. RESPECTFULNESS AND COURTESY OF ADULT DAY SERVICE CAREGIVERS

Of consumers in the Adult Day Services in 2007, 88% reported that their caregivers “always” or “almost always” treated them with respect and courtesy statewide. This percentage is down slightly from 2006 survey results (90%) but the difference is not statistically significant.

Satisfaction levels with this service element reached 100% in three counties (Bennington, Lamoille, and Washington) in 2007. Consumers in these counties were significantly more likely to indicate they were “always” or “almost always” satisfied with the respect and courtesy shown to them by Adult Day Service caregivers than consumers statewide (88%).

Consumers in Washington County were significantly more likely to be satisfied with this service element in 2007 than 2006 (100% vs. 25%). However, consumers in Caledonia County were significantly less likely to be satisfied with this service element in 2007 than 2006 (67% vs. 100%). (Chart 5.3)

Chart 5.3: Percentage of Consumers Who Indicated That They Were Always or Almost Always Shown Respect and Courtesy by Adult Day Service Caregivers

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

D. KNOWLEDGE OF WHOM TO CONTACT WITH COMPLAINTS OR REQUESTS

In 2007, 82% of consumers who received Adult Day Services indicated they “always” or “almost always” knew whom to contact with complaints or requests for additional help. This statewide percentage is down slightly from 2006 survey results (88%) and is closer to results seen in the 2002 survey (83%). These differences are not statistically significant.

Consumers in Orange/Windsor County were significantly more likely to indicate they “always” or “almost always” knew whom to contact with a complaint or for more help than consumers statewide in 2007 (95% vs. 82%). (Chart 5.4)

Chart 5.4: Percentage of Adult Day Services Consumers Who Always or Almost Always Knew Whom to Contact with a Complaint or for More Help

*indicates statistical difference from statewide average at 5%

² indicates statistical difference from 2002 at 5%

⁶ indicates statistical difference from 2006 at 5%

⁷ indicates statistical difference from 2007 at 5%

E. MEETING CONSUMERS NEEDS WHEN AND WHERE NECESSARY

Of consumers receiving Adult Day Services, 88% felt that the services “always” or “almost always” were provided to them when and where they were needed – this percentage is similar to satisfaction levels reported in 2006 (84%) and 2002 (87%). There were no statistically significant changes to report.

Consumers in three counties (Bennington, Lamiolle, and Washington) reported 100% satisfaction levels with this service element in 2007 – a statistically significant difference from consumers statewide (88%). (Chart 5.5)

Chart 5.5: Percentage of Consumers Who Indicated Adult Day Services Were Always or Almost Always Provided When and Where They Needed Them

*indicates statistical difference from statewide average at 5%

CHAPTER VI. SATISFACTION WITH CHOICES FOR CARE PERSONAL CARE SERVICES

Taken as a whole, a smaller percentage of long-term care consumers receiving the State's Choices for Care (CFC) Personal Care Services reported being "always" or "almost always" satisfied with all service elements received in 2007 than in 2002 (Charts 6.1a-6.5a). For consumers statewide, the differences were all statistically significant on these measures. When comparing 2007 survey results to 2006, significant decreases in satisfaction were seen in only two service elements statewide: percentage of consumers who were "always" or "almost always" satisfied with the quality of CFC Personal Care Services (77% vs. 80%) and percentage of consumers who "always" or "almost always" knew who to contact with a complaint or for more help (77% vs. 80%). The continued downward trend in overall satisfaction levels with CFC Personal Care Services indicates concerns possibly related to changes made between 2002 and 2006.

In 2007, the CFC Personal Care Services were broken down into four sub groups for further analysis (Charts 6.1b-6.5b). These subgroups are Flexible Choices, Surrogate Directed, Consumer Directed, and Home Health Agency. On a statewide level, consumers in the Surrogate Directed subgroup indicated the highest levels of satisfaction in four of the five service elements. (Charts 6.1b-6.5b).

Charts 6.1c-6.5c present satisfaction levels with program elements for the 2007 Home Health Agency consumers only. In 2007, Home Health Agency consumers statewide indicated higher levels of satisfaction in three service elements than in 2006. None of these differences are statistically significant.

Sample sizes for data presented in Charts 6.1-6.5 are provided in *Appendix B*

A. SATISFACTION WITH QUALITY OF SERVICES

CFC Personal Care Service consumers statewide were significantly less satisfied with the quality of the services they received in 2007 (77%) than in both 2006 (80%) and 2002 (93%). When comparing 2007 survey results to 2002, consumers in all but four counties (Caledonia, Chittenden/Grand Isle, Franklin and Rutland) reported significant declines in satisfaction with the quality of services. Rutland County was the only region in which consumers reported a significant increase in satisfaction with the quality of CFC Personal Care Services in 2007 (92%) – note this increase is only statistically different from 2002 survey results (90%), not 2006 results (74%).

When comparing 2007 to 2006 survey results, increases in satisfaction were reported in Chittenden/Grand Isle (75% vs. 69%) and Orange/Windsor (80% vs. 71%) counties. However, these increases do not represent a statistically significant difference. The highest levels of satisfaction with the quality of CFC Personal Care Services in 2007 were reported in Rutland (92%), Franklin (84%) and Essex/Orleans (81%). Additionally, consumers in Rutland County were significantly more likely to indicate they were “always” or “almost always” satisfied with the quality of CFC Personal Services than consumers statewide in 2007 (92% vs. 77%). Consumers in Washington County were significantly less likely to indicate they were “always” or “almost always” satisfied with the quality of CFC Personal Care Services than consumers statewide in 2007 (42% vs. 77%). This decline in satisfaction represents a statistically significant difference from 2002 survey results (42% vs. 94%). (Chart 6.1a)

B. DEGREE TO WHICH SERVICES MET CONSUMER NEEDS

In 2007, consumers statewide indicated a slight increase in satisfaction from 2006 survey results (79% vs. 76%) with the degree to which CFC Personal Care services met their needs but these satisfaction levels still represent a statistically significant decline from 2002 survey results (88%).

In 2007, satisfaction levels increased from 2006 survey results in six of the eleven regions including Caledonia (78% vs. 75%), Chittenden/Grand Isle (75% vs. 62%), Franklin (88% vs. 87%), Orange/Windsor (83% vs. 71%), Rutland (88% vs. 74%) and Windham (86% vs. 79%). While these results are indicative of an increase in satisfaction with the degree to which CFC Personal Care Services met consumers' needs in 2007, none of these changes are statistically significant. In fact, 2007 satisfaction levels are still significantly lower than levels reported in 2002.

The highest levels of satisfaction with the degree to which CFC Personal Care Services met consumers' needs in 2007 were reported in Franklin (88%), Rutland (88%), Windham (86%), and Essex/Orleans (85%) counties. Conversely, consumers in Washington County were significantly less likely to indicate CFC Personal Care Services "always" or "almost always" met their needs than consumers statewide (50% vs. 79%). (Chart 6.2a)

C. RESPECTFULNESS AND COURTESY SHOWN BY CFC PERSONAL CARE SERVICES CAREGIVERS

In 2007, 83% of consumers statewide indicated they were “always” or “almost always” shown respect and courtesy by CFC Personal Care Services caregivers, the same level of satisfaction reported in 2006 survey results. These results (83%) indicate a significant decline in consumer satisfaction from 2002 when 95% of consumers reported they were “always” or “almost always” shown respect and courtesy by CFC Personal Care Service caregivers.

In 2007, the highest levels of satisfaction with this service element were reported in Bennington (92%), Rutland (92%) and Franklin (88%) counties. Increases in satisfaction, although not statistically significant, were seen in five of the eleven regions from 2006 to 2007: Bennington (92% vs. 88%), Chittenden/Grand Isle (85% vs. 76%), Orange/Windsor (87% vs. 75%), Rutland (92% vs. 74%), and Windham (86% vs. 83%) counties.

Consumers in Washington County were significantly less likely to indicate they were “always” or “almost always” shown respect and courtesy by their caregivers than consumers statewide in 2007 (58% vs. 83%).

D. KNOWLEDGE OF WHOM TO CONTACT WITH COMPLAINTS OR REQUESTS

Statewide, CFC Personal Care Service consumers were significantly less likely to know whom to contact with a complaint or for more help in 2007 (77%) than in 2006 (80%) and 2002 (84%). Four of the eleven regions reported an increase in satisfaction from 2006 to 2007: Bennington (92% vs. 88%), Chittenden/Grand Isle (75% vs. 74%), Orange/Windsor (80% vs. 68%) and Rutland (84% vs. 68%) counties. However, these increases in satisfaction levels are not statistically significant.

The highest levels of consumer satisfaction with this service element in 2007 were reported in Bennington (92%), Franklin (84%) and Rutland (84%) counties. Additionally, consumers in Bennington County were significantly more likely to report they “always” or “almost always” knew whom to contact with a complaint or request than consumers statewide in 2007 (92% vs. 84%).

CFC Personal Care consumers in Washington County were significantly less likely than consumers statewide to indicate they “always” or “almost always” knew whom to contact with a complaint or request in 2007 (42% vs. 77%). (Chart 6.4a)

E. MEETING CONSUMERS NEEDS WHEN AND WHERE NECESSARY

Statewide in 2007, 79% of consumers indicated CFC Personal Care Services were “always” or “almost always” provided when and where they were needed. This percentage is slightly higher than 2006 (71%) but still significantly lower than satisfaction levels reported in 2002 (87%). Increases in satisfaction from 2006 survey results were reported in seven of the eleven regions: Caledonia (78% vs. 75%), Chittenden/Grand Isle (81% vs. 62%), Franklin (88% vs. 83%), Lamoille (77% vs. 73%), Orange/Windsor (80% vs. 64%), Rutland (84% vs. 53%) and Windham (81% vs. 71%) counties. However, none of these increases from 2006 survey results are statistically significant.

The highest levels of satisfaction with this service element in 2007 were reported in Franklin (88%), Rutland (84%), Chittenden/Grand Isle (81%) and Essex/Orleans (81%) counties. CFC Personal Care Service consumers in Washington County were significantly less likely than consumers statewide to report that services were “always” or “almost always” provided when and where they needed them (42% vs. 79%) in 2007. (Chart 6.5a)

CHAPTER VII. HOME DELIVERED MEALS

In 2007, the CSS included a set of questions exclusively for consumers receiving Home-Delivered Meals (HDM). These questions were intended to provide additional information about the length of consumer participation, the number of meals received per week, and the adequacy of the meals for particular health problems, as well as client participation in other food programs.

The 2007 survey results show that, overall, 180 elderly and disabled respondents receiving the State's long-term care services also received home-delivered meals, and 151 respondents received home-delivered meals sometime in the past (pre-2007).

The 2007 survey included a series of questions about different service elements, support and service delivery. In the questionnaire, respondents were asked to rate various service elements using the following five-point scale: "always," "almost always," "sometimes," "seldom," and "never."

Overall, responses to the home-delivered meals are more positive in 2007 than they were in 2006 and 2002. Results showed that most elderly and disabled Vermonters who received assistance from the State's long-term care services perceived home-delivered meals positively on a several measures:

- About two-thirds of consumers (68%) reported that the food delivered tasted good.
- Many consumers had health conditions that affected the foods they were advised to eat (46%) and felt the food delivered met their dietary needs (94%).
- The majority of consumers (92%) felt that the home-delivered meals program improved the quality of their lives.

Survey results from HDM participants are provided in Charts 7.1-7.11.

A. HDM PARTICIPATION AND PROGRAM SPECIFIC QUESTIONS

Charts 7.1-7.8 present results from several questions asked to measure participation in HDM and questions asked exclusively of HDM program participants.

Chart 7.3: How Long Have You Been Receiving Home Delivered Meals?

Chart 7.4: How Many Meals per Week Do You Receive?

Chart 7.5: Do You Have Any Health Conditions that Affect Which Foods You Have Been Advised to Eat?

Chart 7.6: Which Health Conditions Affected the Foods You Have Been Advised to Eat? (Multiple Responses Allowed)

Chart 7.7: How Often Do Foods Offered through the Home Delivered Meals Program Meet Your Specific Dietary Needs?

Chart 7.8: Do You Participate in the Following Programs?

B. VALUE AND QUALITY OF LIFE MEASURES

HDM participants provided overwhelming positive responses to questions regarding the value of the services, and its impact on their lives:

- 81% of consumers reported that the help they received made their lives "somewhat" or "alot better". (Chart 7.9)
- 65% of consumers rated their overall quality of life as "excellent" or "good" – a slight increase from 2006 (57%) and 2002 (56%) results. (Chart 7.10)
- Only %5 of HDM consumers rated their overall quality of life as "poor", the lowest percentage of all three years.

Chart 7.9: To What Degree Do You Feel that Home Delivered Meals Have Improved Your Quality of Life?

Chart 7.10: Overall, How Would You Rate Your Quality of Life?

C. SATISFACTION WITH HOME DELIVERED MEALS

Consumer satisfaction with HDM in 2007 declined for all but one of the six measures – “cold food is cold” remained at 82%. Although a decline in satisfaction was observed from 2006 survey results, none of these changes are statistically significant. HDM consumers were most satisfied with “the cold food is cold” (82%) followed closely with the “meals provide variety” (81%) in 2007. As in years past, HDM consumers were least satisfied with “the food tastes good” (68%). (Chart 7.11)

APPENDIX A. SURVEY METHODOLOGY

I. Survey Sampling

The sampling plan was designed to provide survey results at the program level, as well as statewide. Specifically, the survey sample was defined as a stratified sample with disproportionate allocation.

Sample strata were defined at the program level and were designed to support estimates of percentages with a worst-case standard error of 5% at the county or regional level. Precision at the State level was not explicitly specified; rather, it depended on the sample sizes resulting from aggregating the sample sizes from the county and regional levels. Since some respondents belong to more than one program, the total number of interviews will not equal the sum of the number of interviews in each program.

In 2002, 2006, 2007 and 2008, the responses provided by respondents receiving Home Delivered Meals were excluded from all charts except for chapter 7, which asks questions specific to Home Delivered Meals. In 2008, 348 of the total 936 responders provided responses that were only reported in the chapter 7 Home Delivered Meals charts.

Sample Size Computations

This disproportionate stratified sample design requires random sampling to occur at the program level. Given the small (from a statistical perspective) average number of cases per program, it is essential that the finite population correction factor is used when determining the sample sizes and computing error margins for the response data. To operationalize general sample size requirements for each survey, it is standard to consider an estimate (\hat{p}) of a population proportion (p) from a random sample of size n from a population of size N . The standard interpretation of a 95 percent confidence interval around \hat{p} is that if the survey were repeated 20 times, an interval constructed as $\hat{p} \pm d$ will contain the true value of the population proportion (p) 19 out of 20 times. The half-width of the confidence interval (d) depends on the sampling variance of statistic and the level of confidence associated with the interval. This study specified the precision of the estimates in terms of the sampling variance of the percentages, as expressed in terms of a standard error $SE(\hat{p})$, rather than in terms of a confidence interval half width.

Using the normal approximation to the distribution of the sample proportion estimate, the standard error, $SE(\hat{p})$ and the population and sample sizes are related by the following inequality:¹

¹ Cochran, W.G. 1963. *Sampling Techniques*. New York: John Wiley & Sons p. 74.

$$\sqrt{\frac{N-n}{N-1}} \sqrt{\frac{p(1-p)}{n}} < SE(\hat{p})$$

Minimum required sample sizes are obtained by setting this equation to equality and solving for n, which yields:

$$n = \frac{\frac{p(1-p)}{SE(\hat{p})}}{1 + \frac{1}{N} \left(\frac{p(1-p)}{SE(\hat{p})} - 1 \right)}$$

The size of the confidence interval varies with the value of p, taking on its maximum value at $p = .5$. For this study, p was assumed to be .5, and the targeted value for the standard error, $SE(\hat{p})$ was taken at 5%, or .05. The denominator of the above equation reflects the finite population correction (FPC) factor. The FPC takes into account the fact that the survey population is finite in size and that sampling is conducted without replacement. It is applied when the sampling fraction for a given population is large and provides a more precise estimate of the true mean response.

Sample sizes were computed using the equation above, based on these assumed and the population sizes N , for each program.

Sampling Procedures

The sampling frame for each survey period was constructed using the Department's consumer database. Lists of active cases were provided to Macro International in electronic format in the fall of 2007. A total of 1,950 cases were provided. In order to complete the target number of surveys, an interview was attempted with each case in the frame.

II. Survey Weighting

Survey weighting is used to assign greater relative importance to some sampled elements than to others in the survey analysis and may be used to "post-stratify" survey data for analysis and make adjustments for total non-response. Since an interview was attempted with each case in the sample frame, no adjustment is necessary to account for disproportionate sampling.

To correct for non-response at the county or regional level, a weighting factor was computed to adjust the number of responding cases to equal the number of cases in the frame for each county or region. Effectively, this allows those who did respond for each county or region to represent those who did not respond. Using the notation developed above, and letting r_i represent the number of clients who responded for the i^{th} county or region, we compute the second component of the weight as:

$$W_i = \frac{n_i}{r_i}$$

III. Survey Analysis

Survey data analysis answered the key research questions identified by the Department. Two primary statistical analysis tools helped to analyze the survey data:

- **Descriptive Statistics**

Response frequencies for survey variables were analyzed and descriptive results, or trends, were identified. Statewide percents are computed were computed as weighted percents from aggregate data.

- **Tests for Statistical Differences**

T-tests for proportions determined whether there were statistically significant differences among sub-groups of the survey population. Results of these tests are reported in terms of their level of significance, or p-value, of the statistical test. The smaller the p-value, the heavier the weight of the sample evidence that there is a statistical difference between groups.

All analyses were conducted using the SAS software package, and incorporated the weights described above. This software correctly models the stratified sampling design, resulting in accurate estimates of variances underlying error margins and other tests for differences among groups.

APPENDIX C. SURVEY QUESTIONNAIRE

2007 Survey of Vermonters Who Use Long-Term Care Services and Programs

The Vermont Department of Disabilities, Aging and Independent Living is very interested in hearing your opinions and experiences with the long-term care programs you use and the services you receive. The information you provide in this survey will be used to help the State of Vermont, and your community, improve long-term care services. You were chosen to participate in the survey because you receive, or have received help in the past, from a long-term care program, such as Adult Day Programs, Choices for Care/Medicaid Waiver Personal Care Services, Homemaker Services, Attendant Services, or Home Delivered Meals.

You can be assured that all of your responses to this survey will be strictly confidential. **Your answers will never be shared with your caregivers, program staff, or anyone else associated with your care or services.** Please answer the survey questions truthfully and to the best of your abilities. There are *no right or wrong answers* to these questions.

If you need help with answering these questions, you may ask someone to help you complete this survey. ***If you prefer, you may also call a special toll-free number, (800) 639-2030, to complete the survey over the telephone or to receive help completing the survey.*** Remember, it is important that you share your opinions and experiences in this survey!

The State of Vermont thanks you for your help with this important study. Your participation will help us to better serve the people who use long-term care programs and services!

1. Who is completing this survey? (Circle one answer.)

- 1 The person who receives the services or care. **CONTINUE TO QUESTION 2**
- 2 Someone acting on behalf of the person receiving services. *(Please respond to the following questions in terms of the person who receives the services or care.)*
(PLEASE ANSWER Question 1A) →

1A. Are you a paid caregiver? (Circle one answer.)

- 1 Yes
- 2 No

2. Are you: (Circle one answer.)

- 1 A man
- 2 A woman

3. For this question, please think about all of the services you receive and programs in which you participate. For example, if you participate in more than one program, try to think about your experiences with all of the programs as a group.

Please give each of the following aspects of your care a letter grade using this scale:

A = Excellent B = Good C = Fair D = Poor

Please place an X in the box that best describes your opinion. If a question does not pertain to the kind of service or help you receive, you may leave the question blank.

	A Excellent	B Good	C Fair	D Poor
A. The amount of choice and control you had when you planned the services or care you would receive.				
B. The overall quality of the help you receive.				
C. The timeliness of your services. For example, did your services start when you needed them?				
D. When you receive your services or care. For example, do they fit with your schedule?				
E. The communication between you and the people who help you.				
F. The reliability of the people who help you. For example, do they show up when they are supposed to be there?				
G. The degree to which the services meet your daily needs such as bathing, dressing, meals, and housekeeping.				
H. How well problems or concerns you have with your care are taken care of.				
I. The courtesy of those who help you.				
J. How well people listen to your needs and preferences.				

4. For what you pay for the services you receive, do you find them a good value?
(Circle one answer.)

- 1 YES
2 NO

5. Would you say the help you have received has made your life: (Circle one answer.)

- 1 MUCH BETTER
- 2 SOMEWHAT BETTER
- 3 ABOUT THE SAME
- 4 SOMEWHAT WORSE
- 5 MUCH WORSE

6. How easy would it be for you to stay in your home if you didn't receive services? (Circle one answer.)

- 1 VERY EASY
- 2 EASY
- 3 ABOUT THE SAME
- 4 DIFFICULT
- 5 VERY DIFFICULT

7. The following statements refer to how you feel about your life now. Place an X in the box that describes your opinion about each statement.

	Yes	Somewhat	No
A. I feel safe in the home where I live.			
B. I feel safe out in my community.			
C. I can get where I need or want to go.			
D. I can get around inside my home as much as I need to.			
E. I am satisfied with how I spend my free time.			
F. I am satisfied with the amount of contact I have with my family and friends.			
G. I have someone I can count on in an emergency.			
H. I feel satisfied with my social life and with my connection to my community.			
I. I feel valued and respected.			

8. Place an X in the box that describes your opinion.

	A Excellent	B Good	C Fair	D Poor
A. Overall, how would you rate your quality of life?				

B. In general, compared to other people your age, would you say your health is:
(Circle one answer.)

- 1 EXCELLENT
- 2 VERY GOOD
- 3 GOOD
- 4 FAIR
- 5 POOR

C. Compared to one year ago, how would you rate your health in general now?
(Circle one answer.)

- 1 MUCH BETTER NOW THAN ONE YEAR AGO
- 2 SOMEWHAT BETTER NOW THAN ONE YEAR AGO
- 3 ABOUT THE SAME
- 4 SOMEWHAT WORSE NOW THAN ONE YEAR AGO
- 5 MUCH WORSE NOW THAN ONE YEAR AGO

D. In the past 12 months, have you been hospitalized? (Circle one answer.)

- 1 YES ➔ *IF YES, please continue to Question E*
- 2 NO ➔ *IF NO, please skip to Question 9 on the next page*

E. If you have been hospitalized more than once, please think back to your most recent hospitalization. When you left the hospital, did you need help with daily activities (for example, dressing, bathing or getting out of bed)? (Circle one answer.)

- 1 YES ➔ *IF YES, please continue to Question F*
- 2 NO ➔ *IF NO, please skip to Question 9 on the next page*

F. Before you left the hospital, did someone talk to you about ways of getting the help you needed with daily activities? (Circle all that apply.)

- 1 YES, THE HOSPITAL STAFF TOLD ME ➔ *IF YES, please go to Question G on the next page*
- 2 YES, A CHOICES FOR CARE REPRESENTATIVE TOLD ME ➔ *IF YES, please go to Question G on the next page*
- 3 NO, I WAS TOO ILL AT THE TIME BUT MY FAMILY MEMBER/FRIEND WAS INFORMED ➔ *IF NO, please skip to Question 9 on the next page*
- 4 NO ONE SPOKE TO ME OR MY FAMILY MEMBER/FRIEND ➔ *IF NO, please skip to Question 9 on the next page*

G. Were you involved in making decisions regarding the help you needed with daily activities? (Circle one answer.)

- 1 YES
- 2 NO, BUT MY FAMILY MEMBER/FRIEND WAS INVOLVED
- 3 NO, NEITHER I NOR MY FAMILY MEMBER/FRIEND WERE INVOLVED

For the next few questions, we would like you to think about the services you receive from each one of the state-sponsored programs in which you participate. Please skip the questions relating to any program in which you DO NOT participate.

For each of the questions, place an **X** in the box that best describes your opinion about the following statements by telling us whether the statement is ***always, almost always, sometimes, seldom, or never*** true.

9. Please answer the following questions if you participate in the ATTENDANT SERVICES PROGRAM. The Attendant Services Program provides assistance with personal care for adults with disabilities. Participants hire, train, and supervise their attendants.

If you do not participate in the Attendant Services Program, skip to Question 10 on the next page.

	Always	Almost Always	Some-times	Seldom	Never
A. I am satisfied with the quality of the services I receive from the Attendant Services Program.					
B. The services I receive from the Attendant Services Program meet my needs.					
C. My caregivers in the Attendant Services Program treat me with respect and courtesy.					
D. I know who to contact if I have a complaint about the Attendant Services Program or if I need more help from the program.					
E. The Attendant Services Program provides services to me when and where I need them.					

10. Please answer the following question if you participate in **HOMEMAKER services.** Homemaker services provides adult Vermonters who need help at home with activities such as cleaning, laundry, shopping, respite care, and limited person care. If you do not receive **HOMEMAKER** services, skip to Question 11.

	Always	Almost Always	Sometimes	Seldom	Never
A. I am satisfied with the quality of the Homemaker services I receive.					
B. The Homemaker services I receive meet my needs.					
C. My caregivers providing Homemaker services treat me with respect and courtesy.					
D. I know who to contact if I have a complaint about Homemaker services or if I need more help from Homemaker services.					
E. The Homemaker services are provided to me when and where I need them.					

11. Please answer the following question if you participate in the CHOICES FOR CARE WAIVER PERSONAL CARE SERVICES. The Choices for Care Waiver Personal Care services provide long-term care to elders and adults with physical disabilities who live at home. Services include help with personal care, adult day services, respite care, assistive devices and case management. If you do not receive Choices for Care Waiver Personal Care Services, skip to Question 12 on the next page.

	Always	Almost Always	Some-times	Seldom	Never
A. I am satisfied with the quality of the Choices for Care personal care services I receive.					
B. The personal care services I receive from the Choices for Care Program meet my needs.					
C. My caregiver(s) in the Choices for Care Program treat(s) me with respect and courtesy.					
D. I know who to contact if I have a complaint about the Choices for Care Program or if I need more help from the Choices for Care Program.					
E. The Choices for Care Program provides personal care services to me when and where I need them.					

- 12. Please answer the following question if you receive ADULT DAY CENTER services.**
Adult Day Center services provide programs for adults with cognitive or physical disabilities including activities, social interaction, meals and personal and health screening. If you do not receive Adult Day Center services, skip to Question 13 on the next page.

	Always	Almost Always	Some-times	Seldom	Never
A. I am satisfied with the quality of the services I receive from the Adult Day Center I attend.					
B. The services I receive from the Adult Day Center meet my needs.					
C. My caregivers at the Adult Day Center treat me with respect and courtesy.					
D. I know who to contact if I have a complaint about the Adult Day Center or if I need more help from the Adult Day Center.					
E. The Adult Day Center provides services to me when and where I need them.					

The following series of questions are about your experience with the HOME DELIVERED MEALS PROGRAM, or MEALS ON WHEELS. The Home Delivered Meals program provides nourishing meals to seniors in their homes who are unable to attend a community meal site and who are experiencing food insecurity. If you do not participate in the Home Delivered Meals Program, skip to Question 21 on page 12.

13. Do you currently receive meals through the Home Delivered Meals Program?

(Circle one answer.)

1 YES ➔ *IF YES, continue to Question 14.*

2 NO ➔ *IF NO, please answer Question 13A.*

13A. Did you receive meals through the Home Delivered Meals program in the past? (Circle one answer.)

1 YES ➔ *IF YES, please answer question 13B.*

2 NO ➔ *IF NO, please skip to question 21.*

13B. Why did you stop receiving meals?(Circle one answer.)

1 I didn't like the food.

2 The food didn't meet my special dietary needs.

3 The meals were delivered at an inconvenient time.

4 I receive meal help from another source (such as friends or family).

5 For another reason. (Please specify below.)

SKIP TO QUESTION 21

14. How long have you been receiving home delivered meals? (Circle one answer.)

1 Less than 6 months

2 6 months to less than 1 year

3 1 year to less than 4 years

4 4 years or more

15. How many meals per week do you receive? (Please write the number in the space below.)

I receive _____ meals per week.

16. Please rate your opinion about each of the statements describing the meals from the HOME DELIVERED MEALS PROGRAM.

	Always	Almost Always	Some-times	Seldom	Never
A. The food tastes good.					
B. The food looks good.					
C. The meals provide a variety of foods.					
D. When the meal arrives, the hot food is hot.					
E. When the meal arrives, the cold food is cold.					
F. The meal is delivered on time.					

17. Do you have any health conditions that affect which foods you have been advised to eat?

1 YES → *IF YES, please answer questions 17A and 17B.*

2 NO → *IF NO, continue to question 18 on the next page.*

17A. Which health conditions have affected the foods you have been advised to eat? (Circle all that apply.)

- 1 Diabetes (you have "sugar")
- 2 Heart Disease
- 3 High Blood Pressure
- 4 Lactose Intolerance
- 5 Kidney Disease
- 6 Other _____

17B. How often do foods offered through the Home Delivered Meals Program meet your specific dietary needs? (Circle one answer.)

- 1 Always
- 2 Almost Always
- 3 Sometimes
- 4 Seldom
- 5 Never

18. To what degree do you feel that home delivered meals have improved your quality of life?(Circle one answer.)

- 1 A lot
- 2 Somewhat
- 3 A little
- 4 Not at all

19. Do you participate in any of the following programs? (Check one column for each program.)

	Yes, I participate	No, I do not participate	I have not heard of this program
A. Commodity Supplemental Food Program (CSFP)			
B. Senior Farmer's Market Nutrition Program			
C. Food Stamps			
D. SHARE New England			
E. Local Food Shelf			
F. Local Soup Kitchen			

20. Do you receive food assistance from any other program or source not mentioned above? (Please write your answer in the space below.)

- 21. The Department of Disabilities, Aging and Independent Living is very interested in hearing *YOUR* ideas about how to make things work better for you and other Vermonters. Please tell us how *YOU* think your services or care could be improved. (Please write your answer in the space below.)**

- 22. Do you have any comments you would like to make about the help you receive? (Please write your answer in the space below.)**

- 23. Would you like someone to contact you about worries or concerns you have about the services or care you are receiving from any of the state-sponsored programs that have been discussed in this survey?**

If so, please provide your name, telephone number, and brief description of your concern. (Please print.)

Name: _____

Telephone: (802) _____

Brief description of worry or concern:

Thank you for completing the survey! Please place the survey in the postage-paid envelope it came with, and mail the envelope.
